

## HemaCollect Staff App

# Put Work-Life Balance at their Fingertips

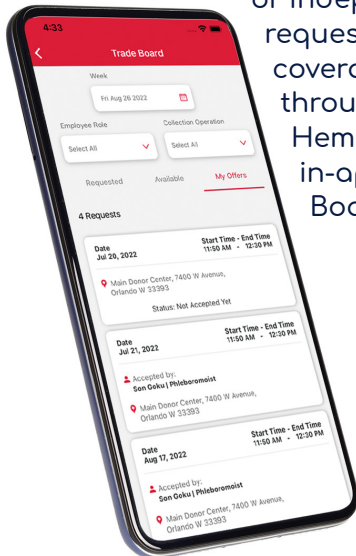

Collecting life-saving products requires a serious time commitment. Help your team ease the daily grind and normalize work-life balance with InVita's HemaCollect Staff App.

## Empower Staff to Trade Shifts and Communicate Autonomously

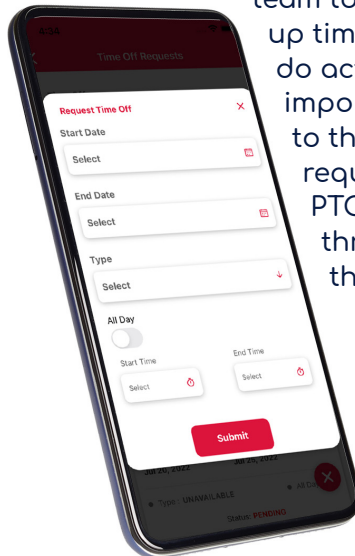

### Enable your team to swap or trade shifts right from their phone

Are staff scheduled to work but have other plans? Let them post shifts they'd like to trade or independently request coverage through HemaCollect's in-app Trade Board.

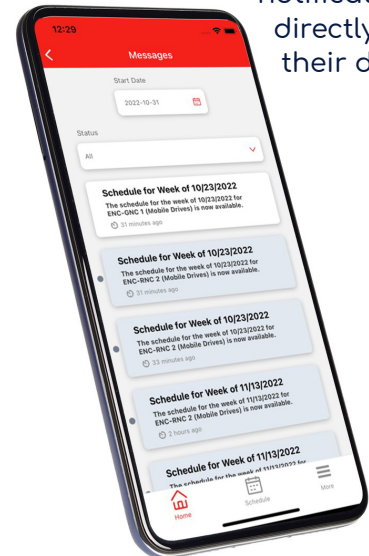

### Receive integrated PTO requests from the palm of your team's hands

Staff working long shifts for days on end? Encourage work-life balance by allowing your team to free up time to do activities important to them by requesting PTO through the app.

### Stay in the loop without calls and emails

Need to send quick updates on PTO requests and schedule changes? Send urgent messages and push notifications directly to their device!

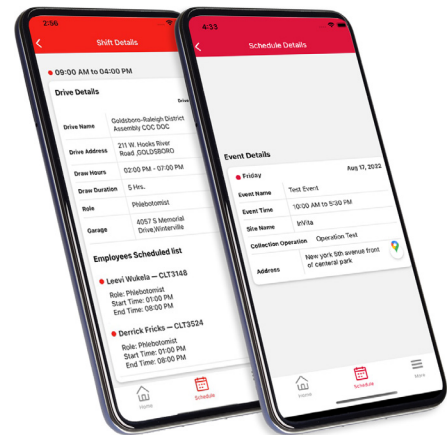

# Need to See When, Where and Who is Scheduled?

InVita's HemaCollect Staff app gives you and your team full visibility with just a few taps.

- Check dates and shifts in seconds
- View non-standard hours and location details
- Integrated with Google Maps – so staff never get lost

**Ditch the paper printouts and time-consuming spreadsheets. It's all in the App!**

## The HemaCollect Staff app turns any smartphone into a staff connector and team builder

### Future-proof schedule plans

Schedule with confidence. Allow staff to manage and view shift details in one place without logging into a browser or laptop.

### Combat call outs with just a few taps

Get ahead of staff call-outs by empowering staff to swap schedules, trade shifts, and request PTO from their device.

### Connect your team

Keep everyone on the same page. Make sure your team knows what days they're on and where they need to be every time.

### Keep your team in sync

Put lost email threads and unnecessary phone calls in the past.

InVita Health provides chain of custody software technologies for complex medical environments including blood and plasma, implant management, forensic, and community care environments. Our solutions optimize supply chains, sample tracking, and visibility across blood and plasma operations, the tissue and implant lifecycle, and environments spanning DNA and forensics. InVita's solutions support increased compliance and cost control, reduced risk, and improved patient and public safety outcomes.
